Secure Your Crypto Assets with SDX Web3 and Focus on Your Business Growth

Discover SDX Web3: Your Trusted Crypto Custody Solution

Our comprehensive custody services address the challenges of institutional clients and provide unparalleled security, transparency and peace of mind. We operate in Switzerland, adhering to local and international regulations and banking requirements for your peace of mind. We are a trusted and experienced infrastructure provider, allowing you to focus on your core business and better serve your clients' needs.

Key Features

We offer advanced measures to prevent loss and theft, along with fully AML-compliant processes, as integral components of our services. Custody and management of crypto assets with SDX is as straightforward as handling any financial asset. Integration into your environment is simplified through automated reporting using ISO Swift standards and API connectivity. Clients can also access cutting-edge services designed for traditional assets, such as collateral management and profit from post trade / settlement services.

Why Choose SDX?

- › Comprehensive security at FMI-level ✓
- › Independently audited and ISAE 3402 certified ✓
- › Customizable account set-up and governance ✓
- › Hot and cold storage options ✓
- › Full regulatory compliance ✓
- › Effortless management and interfacing ✓
- › Value chain integration ✓

SDX Web3' Digital Asset Custody is Tailored to Institutional Needs

Effortless Management and Interfacing

Our user-friendly interface allows you to manage your digital assets seamlessly, with features such as customizable reporting, Rest API, and SWIFT integration.

Flexible Account Models

Flexibility in choosing different segregation models as well as hot and cold storage options according to your business needs.

Customizable Governance

Tailor access and approval protocols to your organization's governance framework, ensuring compliance with internal policies.

Regulatory Compliance

We adhere to the highest regulatory standards (VQF supervised), helping you navigate the complex regulatory environment with confidence.

Value Chain Integration / Support

Leverage advanced features to integrate with other elements of the value chain such as access to liquidity providers, staking services, or TPA solutions.

Comprehensive Security

Our solution combines best-in-class security architecture, highest operational standards, and FMI-grade risk management with relevant 3rd party insurance and controls / certification (e.g., ISAE 2403)
